OPEN FORUM Q&A Session

The Role of Practitioner in the
Private Healthcare Facilities
with

Dr.Haznita Zainal Abidin

Deputy Director, Legislation & Enforcement Unit, Oral
Health Programme, Ministry of Health,
Malaysia.

This Open Forum Session is to provide an opportunity & platform for the Private Dental Practitioners to address and seek clarifications in regards to issues they are encountering with the Dental Regulations & Enforcement. These concerns can be ; setting up and registering of new dental clinics, taking over an existing clinic, sale of old clinics or clarifications in regards to the law and enforcement of dental clinics.

RISK MANAGEMENT IN CLINICAL PRACTICE

By : Assoc Prof Dr.S.Ratnasothy
MAHSA University.

Topic : Overview on Basic Life Support, Managing Cardiac arrest, & Fundamentals of using a Bag Valve Mask Resuscitator (Ambubag) & AED (Automated External Defibrillator).

Speaker : Assoc. Prof Dr. Abdul Ali bin Raja Mohamed, ASA, Head, Dept. of Emergency Medicine/Anaesthesia/Critical Care. Head Unit of Paramedical Science Faculty of Medicine, Bioscience & Nursing, Director, MAHSA Centre of Clinical Skills Education and Training.

Despite important advancements in prevention, sudden cardiac arrest remains the leading cause of death. Seventy percent occur at home and the rest are mostly in the workplace. The outcome from out-of-hospital arrest remains poor.

Basic Life Support consists of a number of medical procedures provided to patients with life threatening conditions of the body, that cause pain or dysfunction to the person. All these techniques are focused on helping patients or sustain life until more precise medical treatment can begin. To some, it can make the difference between life and death! It is thus important that dentists are equally equipped with the necessary knowledge and awareness about BLS and CPR to ensure that they can deliver necessary life-saving measures in cases of emergency. This lecture focuses on the principles and techniques of basic life support and CPR with emphasis given to managing cardiac arrest which is the most common medical emergency seen in a dental clinic setting.

The fundamentals of using, managing and after-care of a Bag Valve Mask (AMBU : Artificial Manual Breathing Unit) bag and AED simulation will also be taught. This is rather important as the AMBU bag is now a compulsory device for every dental clinic to have as it is the simplest and easiest form life saving modality any healthcare professional can provide.

You will learn the psychomotor skills and will practice delivery of High-quality Cardiopulmonary Resuscitation in adults, infant and child. The knowledge and skills learnt in the course would provide you the competency and the confidence and thus giving victims the best chance of survival. This lecture is a useful practical introduction to the BLS Course.

An Open Forum, Q & A Session : The Role of Practitioner in the Private Healthcare Facilities .

Speaker : Dr. Haznita Zainal Abidin, Deputy Director, Legislation & Enforcement Unit, Oral Health Programme, Ministry of Health, Malaysia.

The Private Healthcare Facilities and Services Act 1998 [Act 586] is an act that regulate and control of private healthcare facilities and services while the Dental Act 2018 [Act 804] regulate the practice of dentistry and for related matters. It is the responsibility of dental practitioners to comply with the Acts to ensure that the practice delivered is safe for the Rakyat in a safe facility.

Title : Risk Management in Clinical Practice

Speaker : Assoc. Prof. Dr. S. Ratnasothy, MAHSA University.

This lecture highlights risk management and how to avoid negligence and litigation in your clinical practice. This includes following essential measures such as good clinical examination, proper consent taking , ensuring you are adequately knowledgeable with basic life support and also professionally insured by a Professional Dental Indemnity Insurance Policy. Other measures that will be discussed includes giving an honest opinion on a clinical diagnosis and treatment plan that abides the Malaysian Dental Council Regulation.
